Projects

Analysing shopping trends; Insights into Modern Customer Behavior.

- Built a dynamic Excel dashboard to analyze customer purchase behavior by product categories, seasons, and demographics.
- Tools & Skills: Excel, Pivot Tables, Data Cleaning, Data Visualization.
- Derived actionable insights on purchase frequency, shipping patterns, and payment method distribution, enabling targeted marketing strategies.

Marketing & Sales Impact Analysis - Supplement Industry

- Developed an interactive Power BI dashboard to measure the effectiveness of marketing campaigns on sales performance.
- Tools & Skills: Power BI, Excel

Smart Shopping Insights: Analyzing Customer Trends

Diving into customer data for the first time, I aimed to understand what really drives shopping behavior. Why do some customers spend more? Which products stand out the most? And what hidden patterns exist within thousands of transactions?

Certificates

- Data Analytics
- Diploma in Mechanical Engineering
